

12/1

p161 HW

⑰ 240 is 60% of 400

$$\text{L} \text{ --- } 240 \text{ --- } \text{ --- } ? \text{ --- } \text{ --- } = 400$$

$$\begin{array}{r} 80 \\ 3 \overline{)240} \\ \underline{240} \\ 0 \end{array}$$

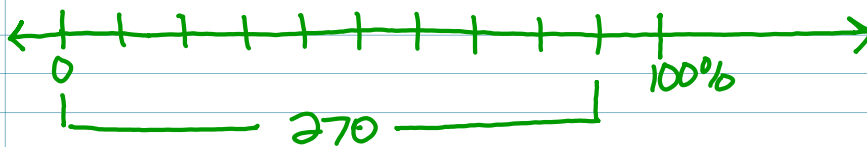

Each of the five 20% "boxes" is 80, therefore $5 \times 80 = 400$.

⑱ 95 is 95% of 100

950 is 95% of 1000

9500 is 95% of 10,000

⑲ 270 is 90% of 300

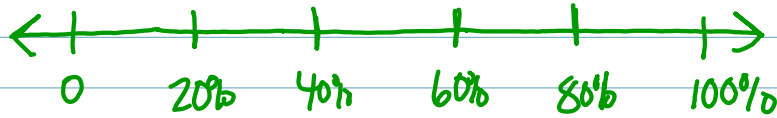

270 is 90% of 300 because $270 \div$ by 9 is 30. There are 10 "30" in 100%, therefore 300 is the total.

12/1

p161 HW

⑰ 240 is 60% of 400

L --- 240 --- | --- ? --- | = 400

$$\begin{array}{r} 80 \\ 3 \overline{)240} \\ \underline{240} \end{array}$$

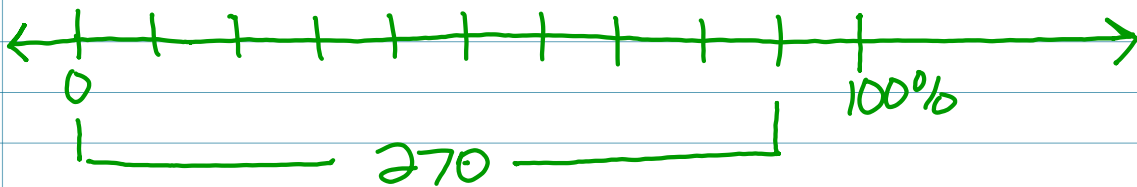

Each of the five 20% "boxes" is 80, therefore $5 \times 80 = 400$.

⑱ 95 is 95% of 100

950 is 95% of 1000

9500 is 95% of 10,000

⑲ 270 is 90% of 300

270 is 90% of 300 because $270 \div$ by 9 is 30. There are 10 "30" in 100%, therefore 300 is the total.
