

9/28 VSVS

conversions of electrical energy to other forms of energy

1. chemical - electrolysis of water ←
2. light (electrical) - light bulbs
3. mechanical - motors & water turbines
4. thermal (heat) - heaters / oven / stove / toaster
5. sound - doorbells

black = negative → why more bubbles?

H<sub>2</sub> is POSITIVE and attracted to  
negative electrode (black)

↳ there are 2 times more bubbles!!

more cranks = faster car?
